

**GAS MAIN EXTENSION POLICY
POLICY E-1**

This Policy is available to Customers taking service under Rate Schedules G-1 and G-2. Customers taking service under other Rate Schedules will be considered separately based on the specifics of each application.

The Company will normally extend its mains or extensions of mains to serve new and permanent Customers applying for service without a contribution from such Customer(s) under the following conditions:

1. When in the Company's opinion the anticipated new annual revenue, excluding Purchased Gas Adjustment, from the Customer(s) requesting the extension(s) is not less than one-fourth of the estimated investment in the extension(s);
2. When condition 1 is not applicable but such investment is to be made in a growing area and in the Company's opinion the development therein will produce the appropriate revenue within three (3) years.

When condition 1 above is not met and condition 2 does not apply, the Customer must pay the difference between the anticipated new annual revenue, excluding Purchased Gas Adjustment, multiplied by four and the estimated investment in the extension as a contribution in aid of construction.

The estimated investment will include the total investment less any costs included in the total investment that should be charged to system improvements.

Large Commercial and Industrial Customers will be considered separately by the Company based upon the specifics of each application.
